## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's arguments with respect to claims 1-8,9,11 and 13-18 have been considered but are moot in view of the new ground(s) of rejection.

### ***Information Disclosure Statement***

2. Information Disclosure Statements (IDSs) received on 8/29/06, the Examiner has considered 9/8/06 and 9/16/06 and the initialed copies (13 pages) of the IDSs are attached with this correspondence.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1,9,11,16,17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Rynderman et al., Rynderman hereinafter (US patent number 5,563,961, newly cited).

Rynderman teaches a compression method which optimizes the compression rate according to the desired throughput comprising:

Art Unit: 2611

Compressing the received data to be stored in a storage device; and measures (claimed tracking the throughput) the average time needed to for storing the compressed data in the storage device and optimizes (claimed compressing second rate if the first rate does not meet the predetermined threshold) the compression rate in response to the measured average storage time and optimal bandwidth (claimed predetermined throughput ) as in claims 1,9,11,16,17 and 18. The compression method of Rynderman monitors (claimed plurality of compression routines in claim 11) the amount of buffer's capacity (bandwidth) and adjusts the compression rate and flow rate so that the buffer is never full or empty. See figure 1 and accompanying test.

#### ***Allowable Subject Matter***

5. Claims 2-8, and 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
